

## Prickly Bay Waterside Development

Prickly Bay Waterside is a luxury residential community situated on the stunning island of Grenada. Winner of multiple International Property Awards and American Property Awards, including Best Development and Best Architecture, the high-end project boasts a unique architectural design modelled after a modern nautical theme. Nautical cues can be found everywhere from the stainless steel railings to porthole windows and symbolic masts that resemble those found on mega yachts. The signature design vision results in a sleek, elegant and ultra-modern development that sets the standards for a new wave of contemporary Caribbean design. On the landside of the swimming pools are manicured lawns. As you move away from the sea, the land starts to rise steeply. Set into the cliff itself and enjoying amazing views over the whole property are the Apartments and Duplex Apartments.

Elegant, white limestone floors fitted throughout. Folding glass doors at the front with large balconies to expand the already generous living space still further.

Beautifully appointed with Miele kitchens and luxury bathrooms, these are fabulous examples of gracious, spacious living.

### Details

**Price**On Request

**Land Area**3.3 Acres

**Property Type**Commercial, Development properties

**Property Status**Exclusive, For Sale

### Features

Air Conditioning

Beachfront

Garage
